

South Sudan Ministry of Health

Integrated Disease surveillance and response (IDSR)

Epidemiological Bulletin Week 44, 2022 (October 30- November 5)

- In week 44, 2022, the IDSR reporting timeliness and completeness were 82% and 88% respectively while the timeliness and completeness for EWARN sites were at 85% and 96%
- A total of 30 alerts were reported in week 44,2022; Malaria (7), AWD (7), ARI (3), measles (3), COVID-19(3) and ARI(3)
- Confirmed outbreak of Sudan Ebolavirus in Uganda with eight districts affected. As of November 16, a total of 141 confirmed cases and 55 confirmed deaths giving a CFR of 39%.
- A total of 22 suspected Ebola Virus Disease (EVD) cases were reported from Nimule, Yei, Yambio, Kajo-keji, Juba, and Rubkona with samples collected from 07 samples collected and all tested negative for EVD.
- On other emergencies, floods have affected over 1.1 million people in 36 counties, and high cases of Acute Malnutrition in South Sudan due to food insecurity.
- Confirmed measles outbreaks in 15 counties since the beginning of the year 2022 with the latest counties affected including Leer, Rubkona (Bentiu camp), Bor South and Melut
- Hepatitis E virus cases continue to be reported in Bentiu IDP Camp with 44 cases reported in week 44 giving a cumulative of 3,592 cases and 26 deaths (CFR 0.72%) reported since week 1, 2019

SURVEILLANCE PERFORMANCE

For the Integrated Disease Surveillance (IDSR) network and Early warning alert and response network (EWARN)

IDSR timeliness performance at State level for week 44 &

Timelinesss States Ranking	States	Number of reporting sites	No. of HFs Reported on Time in WK 44	Timeliness Percentage of WK 44	No. of HFs Reported on Time in WK 43	Timeliness Percentage of WK 43
1st	WES	218	218	100%	218	100%
2nd	Lakes	113	108	96%	89	79%
3rd	CES	129	117	91%	117	91%

Alert management including detection; reporting; verification; risk assessment; & risk characterization

Alert by disease and States in week 44 of 2022 [a total of events specific alerts generated by state

This week a total of 30 Alerts were triggered from the EWARS System with some brokendown as below:

- 2 Guinea Worm alert: these were triggered Marial Ajeth PHCU in Jur River County and Bitti PHCU in Mundri West County
- 1 EBS alerts: This was from Kapoeta Civil Hospital in Kapoeta South County of a 36-years-old male, resident of Palakal boma came to the Kapoeta Civil Hospital on the 28/10/2022. Presented with signs and symptoms consistent with COVID-19 suspect case definition, sample was collected and tested for COVID-19 using Gen Xpert and confirmed Positive
- 2 Measles alerts: these were triggered Koch PHCC (2) in Unity State

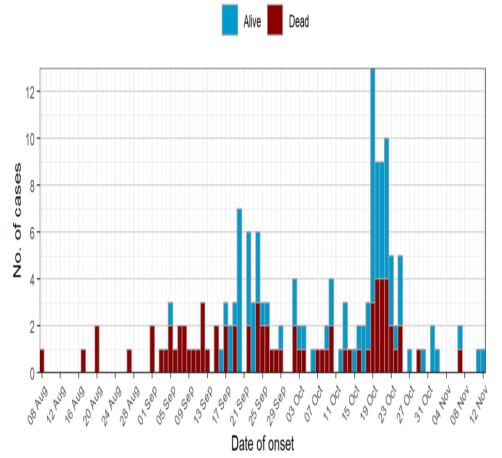

Alert management including detection; reporting; verification; risk assessment; & risk characterization

- On 20th September 2022, the Ministry of Health declared an outbreak of Sudan ebolavirus (SVD) after a case managed at Mubende Regional Referral Hospital (MRRH) in Mubende district was confirmed through testing at the Uganda Virus Research Institute (UVRI)
- November 16, 2022 marks 55 days of response to the Sudan EVD outbreak in Uganda, first case was confirmed on 19-September 2022.
- Cumulatively there are 141 confirmed EVD cases and 55 confirmed death giving a Case Fatality Rate (CFR) of (39%) and a total recovery is 76 out of the total confirmed cases
- A total of 9 districts were affected with most cases reported from Mubende, Kassanda and Kampala.
- As of16th November there were zero new cases and deaths reported from all districts 03 new recoveries from one from Mubende district and two from Kassanda district.
- A total of 607 contacts actively being followedup in seven districts, follow-up rate in the past 24 hours was 85%

Epidemic Curve

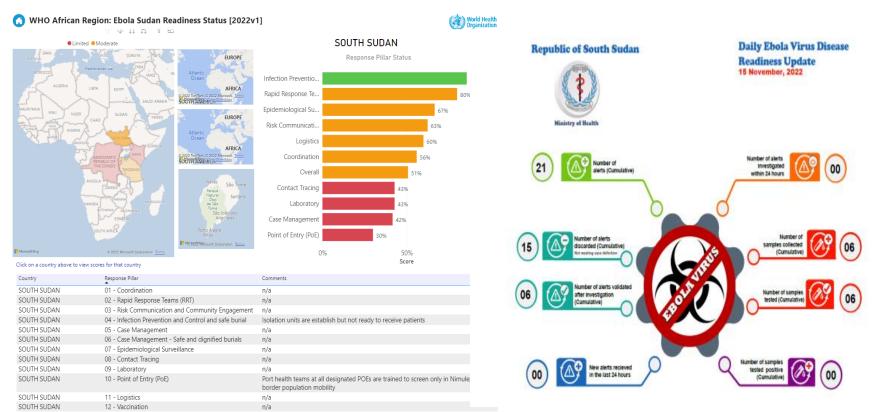

A national level Ebola Virus Disease readiness assessment at the start of the outbreak indicated a few pillars needed urgent strengthening, with PoE, case management, laboratory and contact tracing targeted for priority actions from the start for EVD preparedness

- An outcome of the ministerial meeting co-convened by WHO and Africa CDC in October was for A Regional Ebola Task Force to be established and chaired by South Sudan with coordination support from WHO, Africa CDC and the RECs (EAC, IGAD) to facilitate joint plan of action and monitoring. The first Task Force meeting was held 11 November 2022 during which ToRs where discussed
- A regional functional simulation exercise on public health emergency operations center (PHEOC) 06 - 07 December 2022
- The concept for comprehensive simulation exercise to test operational readiness at national and subnational levels is being developed.
- The comprehensive national EVD plan is the guiding document for EVD preparedness and response. Based on the evolution of the situation in Uganda, WHO is looking to support an technical review and in-depth budgetary review of the national EVD plan.
- ToRs for the EVD task force and for subnational operational readiness strengthening has been updated and developed respectively, with teams already deployed in Nimule and Yei, and to be deployed to other high risk locations

South Sudan: Surveillance updates

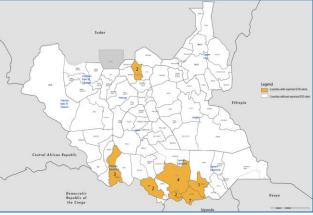

Surveillance indicator table

Indicator	#
Number of alerts (cumulative)	22
Number of alerts discarded (cumulative) (not meeting case definition)	15
Number of alerts validated after investigation (cumulative)	07
Number of alerts received in the last 24 hours	00
Number of alerts to be investigated within the 24 hours	00
Number of samples collected (cumulative)	07
Number sample tested (cumulative)	07
Number of samples tested positive (cumulative)	00

- Cumulatively, a total of 22 alerts have been reported and investigated from seven locations in the country since September 2022: 15 were discarded because they didn't meet case criteria, 6 tested negative
- Nimule (7), Juba (5), Yambio (3), Yei (2), Kajo-keji (2) Rubkona (2) Torit (1),
- 56 frontline healthcare workers for both private (05) and public (10)health facilities in Gumbo Shirikhat and adjacent areas have been sensitized (10 health
- RRT and IPC trainings conducted Kajo-Keji

HCW sensitization in Juba

map showing all EVD alerts to date

Case Management training at the IDU

Case management and Infection prevention and control (IPC) updates

- Isolation and treatment facilities have been established in Nimule and Juba (No. of beds = 16 in Nimule and 20 in Juba)
- Referral system and ambulance team established and trained including the availability of a standby ambulance with support from WHO in Juba and Nimule.
- Comprehensive case management training at the Juba Isolation facility
- Isolation tent set up in Yambio Hospital
- Yei Isolation center under renovation with support from ICRC

Pics.1&2 Juba new IDU

Pic.2 Isolation and management set up within Yambio hospital

Pic.3 Training of Staff and drill at Nimule facility

- National Level EVD RCCE TWG has been activated and is ongoing on weekly basis
- The **Risk Communication strategy** updated, RCCE SOP under review
- 72 hrs Plan finalized and shared RCCE response plan captured
- EVD **Training Module** for front line worker has been developed and under review
- Ebola IEC materials, soft copies shared with partners for
- Produced Radio talk shows, jingles and spots in English, Arabic and translated to local languages
- Toll free hotlines MoH 6666 and UNICEF sponsored hotline under SSCC; 2222 is active and continues to receive community feedback on key issues including disease outbreaks.
- EVD Bulletin prepared and circulated

- The border authorities at the busiest point of crossing between Uganda and South Sudan (Nimule) have leveraged and improved existing formal and informal collaboration in the wake of the emergency.
- The screening site setup at the river side crossing point (well know unofficial) in Nimule is functional

Days/dates	Total screened at the Main PoE	Total screened at the riverside PoE
Monday 7 th .11.2022	3075	155
Tuesday 8 th .11.2022	3210	104
Wednesday 9 th .11.2022	3872	99
Thursday 10 th .11.2022	4147	95
Friday 11 th .11.2022	3074	105
Saturday 12.11.2022	2673	145
Sunday 13 th .11.2022	1790	139

South Sudan is at high risk for importation of the virus due to proximity, trade and people ties with Uganda. This is NOT related to South Sudan's public health capacities

South Sudan: Operations and logistic support (OSL) updates

- PPE prepositioned at each of the 9 hub offices to support EVD readiness activities; re-stocking of PPEs at subnational level is ongoing.
- A second mobile storage unit (rub-hall tent) donated by WFP to support EVD readiness at the new IDU site in Juba.
- The national logistics TWG is coordinating the PPEs stock and supplies distribution using the already existing supply request portal <u>https://ee.humanitarianresponse.info/s</u> <u>ddy70c6</u>

New isolation site Rub-Hall tent donated by WFP to support EVD readiness in Juba

- Inadequate partner participation in the incident management system.
- Inadequate funding to support EVD readiness activities. To ensure adequate preparedness in SSD, there is need for a for financing in a no-regrets manner (as if it is a response)
- Inadequate screening at points of entry in high-risk areas (Yei, Kaya, Yambio, Maridi, Kapoeta, Ikotos, Torit, and Magwi), other PoEs (Kenya, Ethiopia, Sudan, CAR, and DRC), Major hospitals, and healthcare facilities including private healthcare facilities.
- Inadequate number or composition of rapid response teams (RRTs) in some EVD highrisk areas (Kaya, Morobo, Yei & Yambio)

Alert management including detection; reporting; verification; risk assessment; & risk characterization

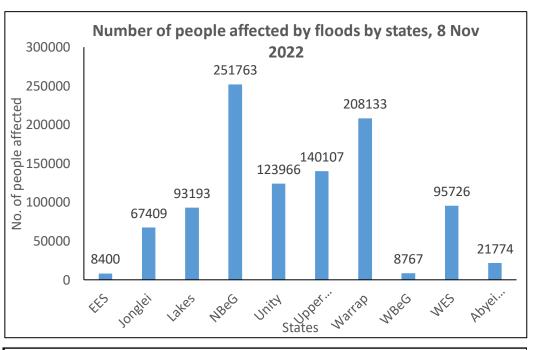

Updates on Floods situation in South Sudan as of November 8, 2022

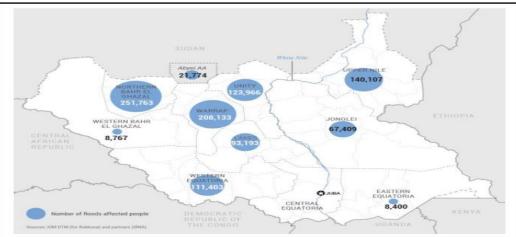

Updates

- Flooding declared a national emergency by the Govt-10 Sept 2022
- More 1.01 million people affected in 36 counties and Abyei Administrative Area across 9 states
- Majority of people affected are in Northern Bahr el Ghazal, Warrap, Upper Nile and Unity
- Impact of floods
 - A total of 62 deaths related to the current flooding
 - Increased cases of snake bite cases (468 cases)
 - 45 HFs and 25 nutrition facilities affected (submerged, cut-off or structural damage sustained)
 - Increased caseload of malaria, Acute Watery Diarrhea, Acute Respiratory Infections
 - Depletion of essential drugs/supplies in health facilities & BHWs

Public Health Response (October)

- Health service delivery: WHO supported the provision of primary health services in Leer, Mayendith, Pibor and Fangak (counties with IPC 5 populations) by supporting 11 static and mobile health facilities in collaboration with implementing partners.
- Outbreak prevention and response: WHO supported 41 600 (first round) during a pre-emptive oral cholera vaccination campaign in Malakal County (including Malakal PoC) in October 2022.

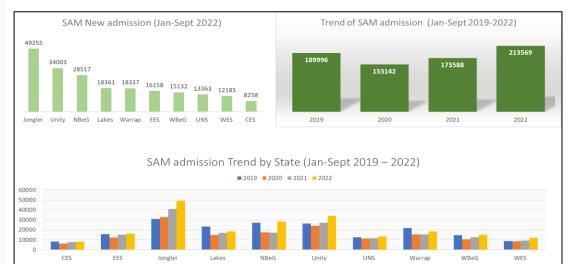

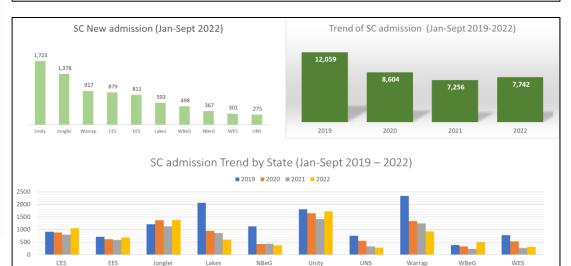

- A total of 6.6 million (53.6% of the population) people are currently facing IPC Phase 3 (Crisis),
- Out of which 2.22 Million are in IPC Phase 4 (emergency) Acute food insecurity
- A total of 61,000 people in IPC Phase 5 in Fangak, Canal/Pigi and Akobo and Pibor counties of Jonglei State and Greater Pibor Administrative A
- 1.4 M U5 children are acutely malnourished of these 345,893 children severely malnourished

Public Health Response

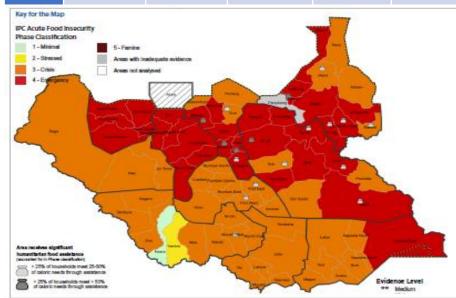

- Core pipeline support for service provision
 - 85 Severe acute malnutrition with Medical Complication kits distributed to stabilization centers in IPC4&5 locations
 - 341 Interagency Emergency Health Kits and 70 pneumonia kits distributed to health facilities and implementing partners in priority locations
 - 170 Cholera investigation and treatment kits prepositioned and distributed to priority locations
- Assessment conducted to evaluate inpatient management of SAM in the health facilities in IPC4&5
- Capacity building of health workers
 - 26 health workers trained on inpatient management of Severe acute malnutrition with Medical Complication
 - 50 health workers trained on nutrition surveillance (Aweil South and Panyijiar)
- 11 health facilities (static and mobile) supported to provide primary health care in four priority IPC 5 locations (through subgranted implementing partners)

Challenges

- Multiple emergencies-overstretching capacities in-country
- Inadequate emergency health kits and other supplies
- Long lead time for international procurements for emergency health kits
- Limited accessibility to basic health care services owing to flooding and insecurity

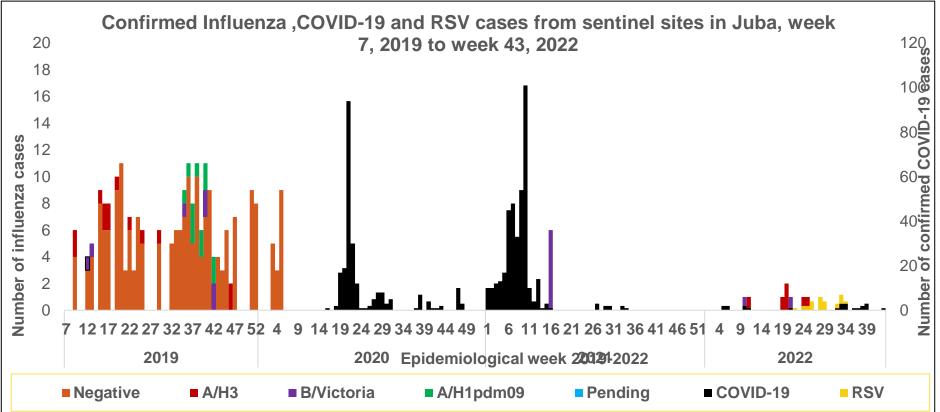

Achievements Vs Target and People in Need

Program	People in need	Cluster Target	New Admission (Jan-Sept 2022)	Achieved Vs People in Need	Achieved Vs Target
SC	45,324	36,249	7,787	17%	21%
SAM	302,163	241,662	213,569	71%	88%
MAM	1,039,472	6,754,189	464,879	45%	7%
PLW	675,710	540,438	409,521	61%	76%

Routine Sentinel Surveillance | Human Influenza & other Respiratory Pathogens

- There are currently Four designated Influenza sentinel surveillance sites in Juba (Juba Teaching Hospital and Al Sabah Children's Hospital Rumbek State Hospital & Juba Military Hospital) that are collecting epidemiological data and samples from ILI/SARI cases.
- By the end of wk. 52 of 2021, a total of 266 ILI/SARI samples have been collected and tested in NPHL, 257 being negative; 6(2%) positive for Influenza B (Victoria); 3 (1%) positive for Influenza A (H3) and zero(0%) positive for Influenza A (H1)pdm09.
- From week 1-to 43,2022; a total of 484 ILI/SARI samples were collected,429 samples tested negative, and Cumulatively, 21 tested positive for covid-19,1 positive for Influenza B (Victoria), and 5 positive for influenza A(H3). 26 RSV was confirmed in Week 43

ACTIVE OUTBREAKS AND PUBLIC HEALTH EVENTS

Brief epidemiological description and public health response for active outbreaks and public health events`

Response| Summary of major ongoing outbreaks in 2022

			N	C		Interventio	ns

Measles Cases in South Sudan 2021 and 2022

Descriptive Epidemiology

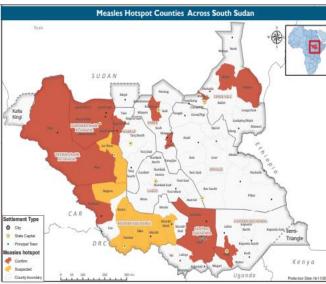

- A total of 1621 cases, of and 21 deaths (CFR, 1.2%) were reported since the beginning of 2022
- However, measles outbreaks were confirmed in 15 counties since the beginning of the year 2022
- Highest number of cases were reported from Aweil
 West (426) and Juba (406) counties
- Measles cases is being reported from (11 counties) Juba, Terekeka, Malakal, Rubkona, Leer, Aweil North, Aweil East, Aweil South, Aweil North, Aweil Centre, and Melut
- Measles cases is still being reported in Northern Bahr el Ghazal despite the vaccination campaigns conducted in all (5)counties.
- The surge in measles transmission is can be attributed to the accumulation of susceptible children due to low routine vaccination coverage in the country.

Public Health Response

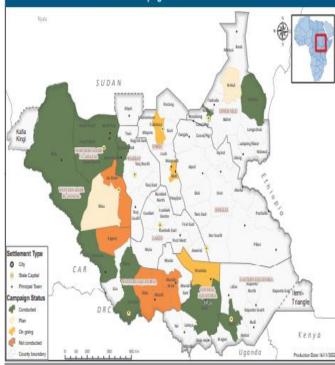

- A total of 755,768 children aged 6 months to 14 years have been vaccinated in (12) counties during the reactive campaigns
- Plans are underway to conduct a vaccination campaign in Leer county, Rubkona, Wau and Bor South counties
- Reactive vaccination campaigns have been conducted underway in Juba and Malakal
- Measles risk assessment conducted by EPI and counties were risk assessed according to the
- Nationwide catchup campaign planned to take place in April 2023

Measles Reactive campaigns conducted in 2022

World Health Organization

Descriptive

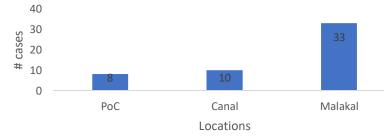

- Total of 52 cases reported from Malakal between week 28 and week 39, 2022.
- Peak of cases reported in week 37 with
- Majority of the cases (94%) were reported in children less than 5 years of age
- (50%) males and (50%) females
- 41.9% (17 cases) of the cases were admitted for inpatient management; with no deaths reported so far.
- Ongoing response
- Active case search and line listing of cases are ongoing, and cases have been referred to the health facilities.
- Cases are being managed in different health facilities; this includes the provision of supportive management, vitamin A supplementation, and treatment of secondary infections
- Reactive vaccination campaigns conducted in affected payams by, conducted by partners
- Refresher training on measles surveillance and treatment is planned for state RRTs and frontline health workers
- Efforts underway to strengthen routine immunization services

Bar graph showing measles cases in Malakal county from week 28 to week 39, 2022.

Bar graph showing measles cases in Malakal county from week 28 to week 39, 2022.

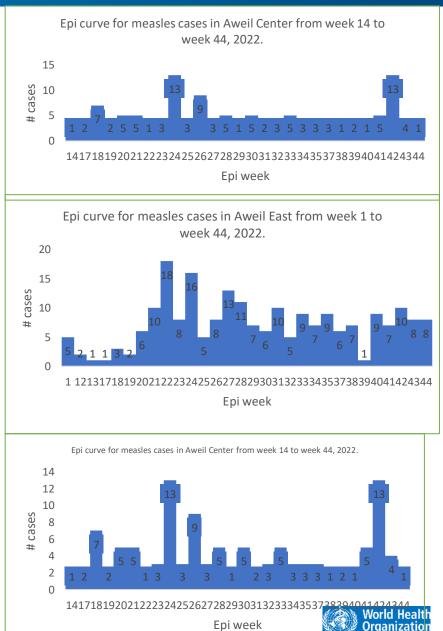

Ongoing Measles Outbreak in Northern Bahr el Ghazal

Descriptive

- Northern Bahr el Ghazal state continues to report suspected measles cases despite reactive campaigns conducted in the middle of the year
- Active cases being reported in all 5 counties of Northern Bahr el Ghazal with the majority of cases reported from Aweil East
- Majority of the cases are (90%) were reported from children less than 5 years of age.
- Majority of the cases are admitted for inpatient management; with no deaths reported so far.

Ongoing response

- Active case search and line listing of cases are ongoing, and cases have been referred to the nearest health facilities.
- Cases are being managed in different health facilities; this includes the provision of supportive management, vitamin A supplementation, and treatment of secondary infections
- Reactive vaccination campaigns conducted previously in affected payams by
- Routine immunization services need to be strengthened

South Sudan

Measles cases in Bentiu Camp, Rubkona County as of week 43

Descriptive EPI

17 cases of measles were reported from Bentiu camp, Rubkona county from week 39 to 43, 2022

- Majority of the cases, 8 out of 17 were reported from sector 3 within Bentiu camp
- Children age 0 to 4 years accounted for majority of the cases

Majority of the cases are admitted for inpatient management; with no deaths reported so far.

•Of the 17 cases reported, 7/17 (58%) have indicated that they have received vaccination against measles and 10/17(42%) reported no against the vaccination status

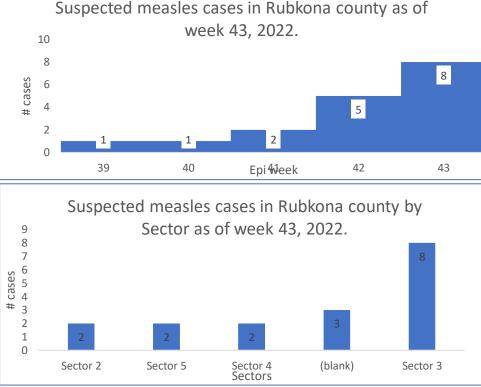

Ongoing response

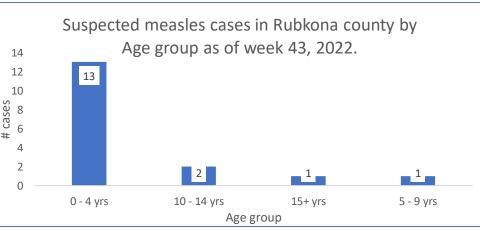

Active case search and line listing of cases are ongoing, and cases have been referred to the nearest health facilities within the camp.

Cases are being managed in different health facilities; this includes the provision of supportive management, vitamin A supplementation, and treatment of secondary infections

Reactive vaccination campaign is planned for by the state Ministry of Health and MSF

Routine immunization services to be strengthened through RCCE and health promotion activities

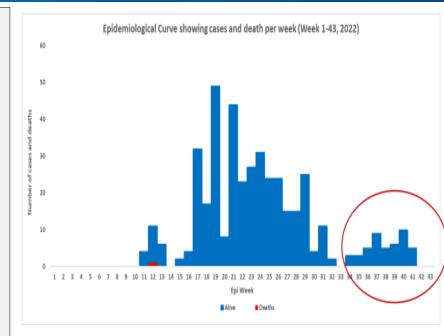

Confirmed Cholera Outbreak in Bentiu, Unity State and OCV updates

- V. cholerae case confirmed on 14 Apr 2022 in Bentiu.
- Since the last update in week 42, Zero new cases have been reported from Rubkona county. Zero cases in admission in cholera treatment units as of 30 October 2022
- Zero new deaths were reported during week 43, 2022.
- Cumulatively, a total of 424 cholera cases including one death have been

reported since March 2022

OCV Implementation

- 1,677,500 doses of OCV have been received
- 1,584,147 doses have been administered
 - Concept note on need for OCV the doses
 - And additional resources for flooded hotspot locations
- Round 2 in Malakal and Awerial counties are planned for;

S/N	LOCATION	TARGET	POPULATION	COV	/ERAGE	
			1st round	2nd Round	1st round	2nd Round
1	Rubkona Phase 1 (Category 1)	202,627	173,170 (24- 31 Jan 2022)	175,044 (14-20 Mar 2022)	85%	86%
2	Rubkona Phase 2 (category 1)	31,680	25,196 (12-18 May 2022)	32,075 (4-10 June 2022)	80%	101%
3	Leer	75,333	64,033 (April 2022)	35,375 (31 May 2022)	85%	47%
4	Yirol East	118,163	109,206 (2-9 August 2022)	111,509 (14-19 Sept 2022)	92%	94%
5	Awerial	94,149	84,184 (16 Aug 2022)	Planned	89%	TBD
6	Juba	633,335	400,584 (10-19 June 2022)	373771 (5 Sept 2022)	63%	59%
7	Malakal	63,476	32,624 (29 Oct -2 Nov 2022)	Planned	51%	TBD

Confirmed Anthrax Cases in Gogrial West, Warrap State as of week 43

Kusc Horth

Kusc South

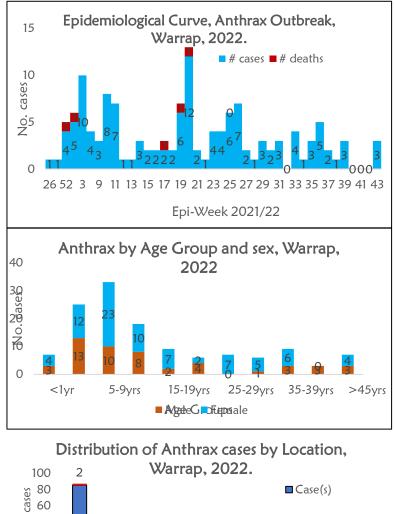

5

- Suspected anthrax cases were detected at the Kuajok hospital, and a retrospective review of the facility registers revealed over cases in the past two months.
- On 18th May 2022, a national team composed of MOH, MOAF, WHO, ICAP, and FAO visited the state to conduct an in-depth epidemiological investigation and response. The team visited Kuajok hospital, Gogrial PHCC, and Alak PHCC to review register books. The team also visited 24 villages where Anthrax suspected cases come from
- three new cases were reported in week 43, 2022 bringing the total number of cases line-listed to 131 cases and 5 deaths, case fatality rate (CFR 3.2%).
- All cases are from one County of Gogrial West. 62.9% of the cases are from Kuac North Payam. 62% of the cases are among females and 38% among Males.
- Out of the 18 samples collected, 8 tested positive by PCR for bacillus anthracis.
- A total of 10 animal samples were collected by the animal health experts and 3 soil samples for further analysis.

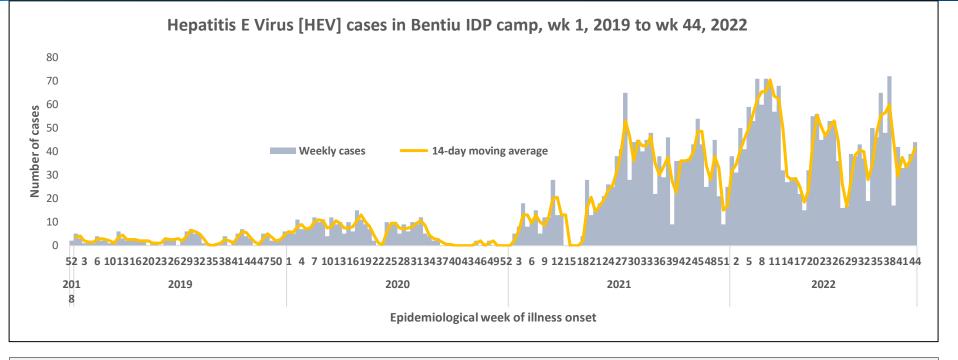

Ongoing response

- partial vaccination campaign in the three (3) counties of Gogrial East and West in addition to Tonj North where 180,000 ruminants were targeted (2nd – 18th August 2022) ; coverage was at a low 42% and more remains to be done given a balance of Anthrax vaccines.
- Active case search and line listing of cases in the affected county and the surrounding and Case management is underway at Kuajok hospital.
- Risk communications and community engagements activities are ongoing through local radios to reduce the risk of exposure
- Ongoing multisectoral coordination meetings at state and national levels.

Response Confirmed epidemics; Hepatitis E, Bentiu IDP camp (1)

Descriptive epidemiology

- The persistent transmission of HEV in the Bentiu IDP camp continues with 3,592 cases since the beginning of 2019
- 44 AJS new cases with (zero deaths) were reported in week 44, bringing the cumulative cases to 3,592 (26 deaths) since the onset of the outbreak in 2018.
- HEV transmission has reduced from a peak of 60 cases every fortnight by week 8, 2021 to 44 cases every fortnight by week 44, 2022.
- All the cases have been managed as outpatient cases except for seven cases that were admitted
- No death was reported in 2022
- 46% are female and 54% are male. Within the IDP camp, the sector-specific attack rates for HEV disease for the period week 1, 2022 are highest in sectors 3 and 5.

HEV response update

- 1. Multisectoral joint cholera and HEV response coordination at the state level; biweekly coordination forum comprising health, WASH, and other clusters
- 2. Surveillance enhanced through the provision of refresher training, distribution of case definition, and other reporting tools
- 3. Weekly analytics of the outbreak data to monitor trends and inform decision making
- 4. Case management for symptomatic cases provided by the PHCCs; severe cases are referred to MSP PoC Hospital
- 5. The HEV vaccination campaign was conducted in Bentiu IDP Camp; the first round with a coverage of 91% and the second round with a coverage of 82% among those aged 16-40 years (incl. pregnant women); the third round is expected to be conducted in October 2022
- 6. Risk communication and awareness are enhanced through household health promoters/hygiene promoters; radio talk shows and messaging. Cholera and HEV messages were disseminated.
- 7. Enhanced access to safe drinking water, sanitation facilities such as latrines, mass clean-up campaigns, regular water quality testing, and monitoring

HEV response challenges

- 1. Lack of long-term investment to improve the WASH situation in the camp
- 2. Lack of meaningful behavioral changes among the population
- 3. Frequent population movements between the IDP and host communities; the host community was not vaccinated
- 4. Upcoming flooding season will likely worsen the WASH situation

COVID-19 Virus Situation Summary

Situation update as of 18, Nov 2022

- Globally as of 18 November 2022, there have been 633,601,048
 confirmed cases of COVID-19, including 6,596,542 deaths, reported to WHO. As of 15 November 2022, a total of 12,943,741,540 vaccine doses
 have been administered..
- In Africa, as of 18 November 2022
 there have been 9,381,366
 confirmed cases of COVID-19,
 including 175,038 deaths reported
 to the WHO

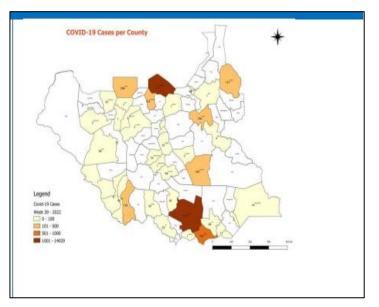

WHO: https://www.who.int/health-topics/coronavirus

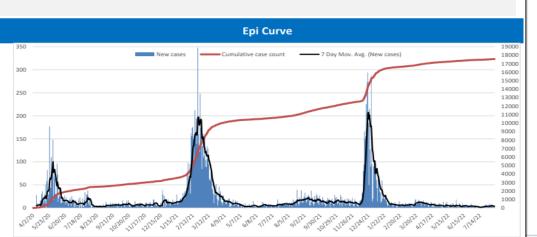

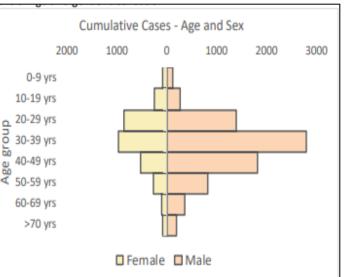

COVID-19 Response in South Sudan as of week 43, 2022

- 18 313 COVID-19 cases, 18 126 recoveries, and 138 deaths (case fatality rate of 0.75%) have been reported as of the end of October 2022 (epidemiological week 43).
- Detection and testing of COVID-19 are inadequate; the testing level is low at about 300 per day. Antigen rapid testing, PCR testing and GeneXpert platforms in public health and private facilities are being utilized to scale up testing capacity in the country.
- 15 new cases were confirmed in epidemiological week 43 (ending on 30 October), an 11.8% decrease in reported cases compared to epidemiological week 42 (ending on 23 October). This is the fifth consecutive week of the observed decrease in the weekly COVID-19 case tally.
- The low test positivity rate of 0.7% in epidemiological week 43 is a decrease from the 1.0% positivity rate reported in epidemiological week 42
- 15.36% (2 101 283 individuals) have been fully vaccinated using different antigens delivered through several vaccination strategies. Notably, more than 91.3% of healthcare workers have been vaccinated.
- For more information on the COVID-19 outbreak and public health response measures, refer to the national weekly situation update

https://app.powerbi.com/view?r=eyJrljoiNDJlZGY4YWItMmM1My00M2E4LWFiNDUtZjcxYzAyYmMyY2IzliwidCl6ImY2MTBjMGl3LWJkMjQtNGlzOS04 MTBiLTNkYzI4MGFmYjU5MClsImMiOjh9

OVERALL CONCLUSIONS AND RECOMMENDATIONS

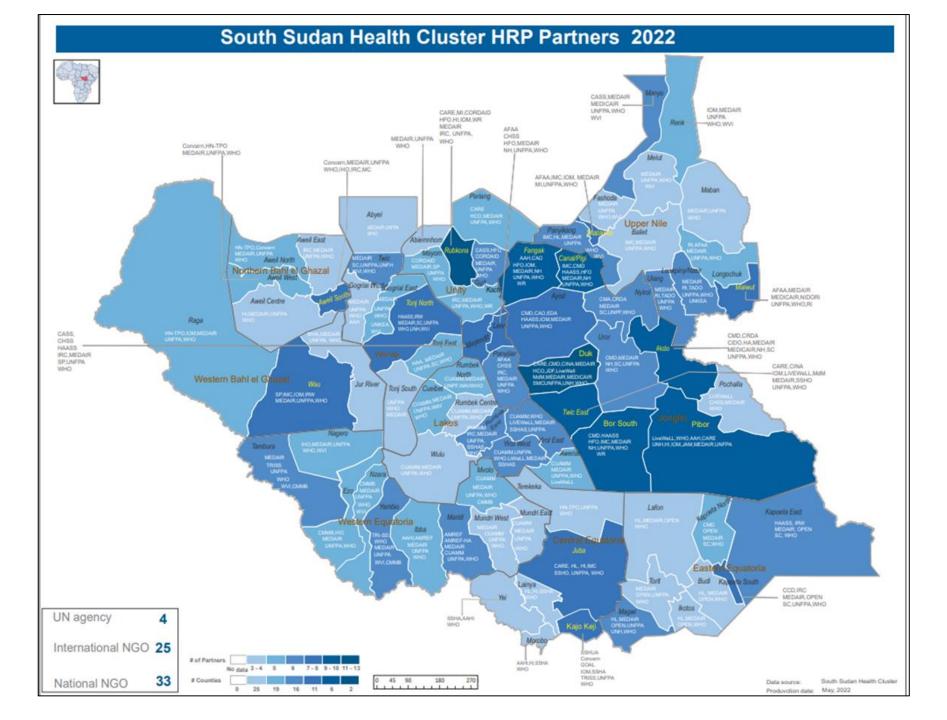

Conclusions

- The overall performance of IDSR and EWARN reporting sites in week 44, 2022 is above 80% for both IDSR sites and EWARN sites
- Onlyof 30 alerts were reported in week 44,2022; Malaria (7), AWD (7), ARI (3), measles (3), COVID-19(3) and ARI(3)
- Confirmed outbreak of Sudan Ebolavirus in Uganda Mubende district as the epicenter with other four districts with at least a confirmed case. As of November 11, a total of 141 cases and 55 confirmed deaths giving a CFR of 39%.
- A total of 22 suspected Ebola Virus Disease (EVD) cases were reported from Nimule, Yei, Yambio, Kajo-keji, Juba, and Rubkona with samples collected from 06 samples collected and all tested negative for EVD.
- Other emergencies like floods and food insecurity have affected 1.1 million people and 6.6 million people respectively
- Confirmed measles outbreaks in 15 counties since the beginning of the year 2022 with the latest counties affected including Leer, Rubkona (Bentiu camp), Bor South and Melut

Hepatitis E virus cases continue to be reported in Bentiu IDP Camp with 44 cases reported in week 44 giving a cumulative of 3,592 cases and 26 deaths (CFR 0.72%) reported since week 1, 2019

Recommendations

- Partners to continue supporting County Health Departments (CHD) & State Ministries of Health on timely IDSR/EWARN reporting
- Health facilities to conduct an initial investigation on suspected cases of epidemicprone diseases and collect samples
- Strengthen EVD surveillance, Infection Prevention and Control (IPC) and Risk communication and community engagement (RCCE) in high-risk areas of Juba, Yei, Yambio, Kaya, Nimule and Kako-keji
- Conduct reactive measles vaccination campaign in counties with confirmed outbreaks and advocate for enhanced routine immunization through PIRI
- Support the multicluster HEV response strategy in the Bentiu IDP camp and the ongoing cholera outbreak

Notes

WHO and the Ministry of Health gratefully acknowledge the surveillance officers [at state, county, and health facility levels], health cluster and health pooled fund (HPF) partners who have reported the data used in this bulletin. We would also like to thank ECHO, USAID and World Bank for providing financial support.

The data has been collected with support from the EWARS project. This is an initiative to strengthen early warning, alert and response in emergencies. It includes an online, desktop and mobile application that can be rapidly configured and deployed in the field. It is designed with frontline users in mind, and built to work in difficult and remote operating environments. This bulletin has been automatically published from the EWARS application.

More information can be found at http://ewars-project.org
